COMMISSION OIL BULLETIN NO.281

The weekly oil bulletin, published by the Commission, gives the latest available data relating to price development in the Member States and for the Community as a whole. The Commission considers that the bulletin contributes to improved transparency as regards Community oil markets.

The figures given in each bulletin follow the development over time of certain prices. They permit a comparison at any instant in time between Member States but such a comparison may not be representative of international price relationships over a longer period. Moreover, it is evident that such a comparison is limited even if fluctuations in exchange rates are ignored; although valid for identical products sold to the same categories of consumer no account is taken of market structures, (the product categories reported are not in every case representative of the bulk of sales for each product in each country), quality specifications and methods of distribution which are unique to each Member State. In this context the essentially indicative nature of some elements of table 2 is emphasised.

A detailed methodology will be appended to the bulletin published at the beginning of each quarter.

The Commission Oil Bulletin is freely available on demand (telephone 235.35.75).

Weekly summary :

Evolution (in %) of Community indications for :

- 1^o) Weighted average pre-tax prices
for principal oil products at 25.2.1985 (Table 2)

compared with 15.12.1978 : +53%

compared with previous week -2,80%

- 2^o) Weighted average CIF cost of crude (1)
oil supplies for November 1984 (Table 3)

compared with 15.12.1978 +104,70%

- (1) The CIF supply cost is derived from monthly declarations by Member States (see Oil Bulletin 252 for methodology).

COMMISSION OIL BULLETIN NO. 284

The weekly oil bulletin, published by the Commission, gives the latest available data relating to price development in the Member States and for the Community as a whole. The Commission considers that the bulletin contributes to improved transparency as regards Community oil markets.

The figures given in each bulletin follow the development over time of certain prices. They permit a comparison at any instant in time between Member States but such a comparison may not be representative of international price relationships over a longer period. Moreover, it is evident that such a comparison is limited even if fluctuations in exchange rates are ignored; although valid for identical products sold to the same categories of consumer no account is taken of market structures, (the product categories reported are not in every case representative of the bulk of sales for each product in each country), quality specifications and methods of distribution which are unique to each Member State. In this context the essentially indicative nature of some elements of table 2 is emphasised.

A detailed methodology will be appended to the bulletin published at the beginning of each quarter.

The Commission Oil Bulletin is freely available on demand (telephone 235.35.75).

COMMISSION OIL BULLETIN NO. 287

The weekly oil bulletin, published by the Commission, gives the latest available data relating to price development in the Member States and for the Community as a whole. The Commission considers that the bulletin contributes to improved transparency as regards Community oil markets.

The figures given in each bulletin follow the development over time of certain prices. They permit a comparison at any instant in time between Member States but such a comparison may not be representative of international price relationships over a longer period. Moreover, it is evident that such a comparison is limited even if fluctuations in exchange rates are ignored; although valid for identical products sold to the same categories of consumer no account is taken of market structures, (the product categories reported are not in every case representative of the bulk of sales for each product in each country), quality specifications and methods of distribution which are unique to each Member State. In this context the essentially indicative nature of some elements of table 2 is emphasised.

A detailed methodology will be appended to the bulletin published at the beginning of each quarter.

The Commission Oil Bulletin is freely available on demand (telephone 235.35.75).

Weekly summary :

COMMISSION OIL BULLETIN NO. 290

The weekly oil bulletin, published by the Commission, gives the latest available data relating to price development in the Member States and for the Community as a whole. The Commission considers that the bulletin contributes to improved transparency as regards Community oil markets.

The figures given in each bulletin follow the development over time of certain prices. They permit a comparison at any instant in time between Member States but such a comparison may not be representative of international price relationships over a longer period. Moreover, it is evident that such a comparison is limited even if fluctuations in exchange rates are ignored; although valid for identical products sold to the same categories of consumer no account is taken of market structures, (the product categories reported are not in every case representative of the bulk of sales for each product in each country), quality specifications and methods of distribution which are unique to each Member State. In this context the essentially indicative nature of some elements of table 2 is emphasised.

A detailed methodology will be appended to the bulletin published at the beginning of each quarter.

The Commission Oil Bulletin is freely available on demand (telephone 235.35.75).

BULLETIN PETROLIER No. 292

4417.411

Les bulletins pétroliers que la Commission publie chaque semaine indiquent les derniers renseignements disponibles sur les éléments concernant la formation des prix dans la Communauté et ses Etats Membres. Ces bulletins doivent contribuer dans l'esprit de la Commission à assurer une meilleure transparence des marchés pétroliers dans la Communauté.

Les chiffres indiqués dans chaque bulletin traduisent l'évolution dans le temps de certains prix. Ils permettent à un moment donné une comparaison entre Etats Membres mais une telle comparaison peut ne pas être représentative des rapports de prix internationaux au cours d'une longue période de temps. En outre, il est évident que cette comparaison, indépendamment de l'effet perturbateur des modifications de change, a des limites : incontestable pour des produits identiques vendus aux mêmes catégories de consommateurs, elle ne prend pas en compte les structures de consommation (les catégories de produits recensées ne représentent pas toujours l'essentiel des ventes pour chaque produit ou chaque pays), les spécifications de qualité et les méthodes de distribution propres à chaque Etat Membre. En ce sens on doit souligner la nature essentiellement indicative de certains éléments du Tableau 2.

Une description détaillée de la méthodologie utilisée sera jointe en annexe du bulletin paraissant au début de chaque trimestre calendaire.

Le bulletin pétrolier de la Commission est mis gracieusement à la disposition de ceux qui en effectuent la demande (tél. 235.35.75).

Résumé de la semaine :

évolution (en %) des indicateurs communautaires du

1^o) Prix moyen hors taxes pondéré des
grands produits pétroliers au 20.5.1985 (Tableau 2)

par rapport au 15.12.1978

+57%

par rapport à la semaine précédente

-

2^o) Coût CAF d'approvisionnement en
pétrole brut en février 1985 (Tableau 3)

par rapport au 15.12.78

+101%

(1) Le coût d'approvisionnement provient des déclarations mensuelles des Etats membres (cf bulletin 252 pour méthodologie).

COMMISSION OIL BULLETIN NO. 293

The weekly oil bulletin, published by the Commission, gives the latest available data relating to price development in the Member States and for the Community as a whole. The Commission considers that the bulletin contributes to improved transparency as regards Community oil markets.

The figures given in each bulletin follow the development over time of certain prices. They permit a comparison at any instant in time between Member States but such a comparison may not be representative of international price relationships over a longer period. Moreover, it is evident that such a comparison is limited even if fluctuations in exchange rates are ignored; although valid for identical products sold to the same categories of consumer no account is taken of market structures, (the product categories reported are not in every case representative of the bulk of sales for each product in each country), quality specifications and methods of distribution which are unique to each Member State. In this context the essentially indicative nature of some elements of table 2 is emphasised.

A detailed methodology will be appended to the bulletin published at the beginning of each quarter.

The Commission Oil Bulletin is freely available on demand (telephone 235.35.75).

COMMISSION OIL BULLETIN NO. 296

The weekly oil bulletin, published by the Commission, gives the latest available data relating to price development in the Member States and for the Community as a whole. The Commission considers that the bulletin contributes to improved transparency as regards Community oil markets.

The figures given in each bulletin follow the development over time of certain prices. They permit a comparison at any instant in time between Member States but such a comparison may not be representative of international price relationships over a longer period. Moreover, it is evident that such a comparison is limited even if fluctuations in exchange rates are ignored; although valid for identical products sold to the same categories of consumer no account is taken of market structures, (the product categories reported are not in every case representative of the bulk of sales for each product in each country), quality specifications and methods of distribution which are unique to each Member State. In this context the essentially indicative nature of some elements of table 2 is emphasised.

A detailed methodology will be appended to the bulletin published at the beginning of each quarter.

The Commission Oil Bulletin is freely available on demand (telephone 235.35.75).

COMMISSION OIL BULLETIN NO.298

4417.411

The weekly oil bulletin, published by the Commission, gives the latest available data relating to price development in the Member States and for the Community as a whole. The Commission considers that the bulletin contributes to improved transparency as regards Community oil markets.

The figures given in each bulletin follow the development over time of certain prices. They permit a comparison at any instant in time between Member States but such a comparison may not be representative of international price relationships over a longer period. Moreover, it is evident that such a comparison is limited even if fluctuations in exchange rates are ignored; although valid for identical products sold to the same categories of consumer no account is taken of market structures, (the product categories reported are not in every case representative of the bulk of sales for each product in each country), quality specifications and methods of distribution which are unique to each Member State. In this context the essentially indicative nature of some elements of table 2 is emphasised.

A detailed methodology will be appended to the bulletin published at the beginning of each quarter.

The Commission Oil Bulletin is freely available on demand* (telephone 235.35.75).
